Student Transportation Software™

Total Transportation Software for PA Schools

Transportation management and the state transportation reimbursement process is an increasingly important, but often overlooked, funding issue for many school districts. With school transportation costs representing the second largest school budget line item, managing the total transportation process, including cash flow and the transportation reimbursement, is critical for today's school business managers. BusTracks™ is the right tool for the job.

BusTracks Software™ manages the details of the total transportation process, including route, rider, driver, vehicle/contract, mileage, calendar, activity bus runs, map information, and state reimbursement.

In addition to ensuring the maximum reimbursement, the cost-saving and time-saving features of BusTracks Software™ include:

▶ Optimized bus routes using DELORME™ map software.

▶ Automated subsidy reporting process using BusTracks etracks™.

▶ Detailed information for special needs students and multiple-district transportation.

▶ Optional link to BusTracks GPS PLUS™ to automatically capture bus route miles with and without riders.

▶ Easy installation on a desktop or laptop; the system does not require a separate server.

BusTracks™ Master Screen is easy to navigate.

BusTracks™
Transportation Management Services

Student Transportation Software™

BusTracks™ Features

▸ Student search by first name, last name, school, grade, and ID

▸ Primary and two alternate addresses, plus address history

▸ Unlimited contact phone numbers

▸ Open notes log by student

▸ Incident log and response details

▸ Detailed building/program contact list

▸ Special data options for managing special needs students

▸ Copy feature for basic sibling information

Five ways to assign students to buses:

▸ Fully-automatic with a "Search for Bus" option

▸ Assign by closest neighbor

▸ Manual assignment by individual student

▸ Door-to-door service option

▸ Assign by entire school

A variety of run management offerings; including:

▸ Pick-up and drop-off stops

▸ Easy movement of groups of students from one bus to another

▸ Mid-year bus replacement option

▸ Automatic re-sequencing of bus stops by time

▸ Simplified creation of transfer bus runs for non-public students

▸ Special needs runs by program and district

Dynamic calendar management by school or district:

▸ Optional day and/or school comment entry

▸ Documentation for snow days/early dismissal days

Standard or customized bus roster, stop list, and other reports:

▸ Report print preview and report history capability

▸ Summary report for walkers, hazardous, non-public, charter school

▸ Email capability for reports

Other management tools for:

▸ Late and activity bus runs

▸ Early dismissal schedules

▸ Driver information records

Information sharing options:

▸ Interfaces with Microsoft Office products for custom letters or postcards to parents

▸ Exports and imports detailed data to Excel spreadsheets

▸ Mass data maintenance for all data categories using Excel

▸ Custom reports for all data categories

▸ Optional revised data import into BusTracks using Excel

▸ Provides easy interface to student information systems

▸ Download or upload to student attendance software, using as many as 100 data elements per student

▸ Interfaces with DELORME maps to display student homes, stops, routes, and boundaries
